PROFESSIONAL SUMMARY

Full Stack Engineer with 1.5+ years shipping end-to-end web applications across healthcare, e-learning, legal compliance, and construction sectors for clients in the UAE and Saudi Arabia. Owns full-stack delivery — schema design, REST API architecture, and responsive front-ends — on production SaaS platforms. Hands-on with OpenAI integration, WebSockets, GitHub Actions CI/CD, and AWS S3.

SELECTED ACHIEVEMENTS

- Shipped features to a production medical SaaS platform serving **20,000+ patients** and healthcare providers across the UAE.
- Contributed to **2 government platforms** (Saudi Ministry of Hajj registration; Saudi legal compliance) and **3 SaaS products** live in production.
- Mentored **3 junior developers** from zero to shipping production code in React.js and Next.js, through code reviews and structured onboarding.

PROFESSIONAL EXPERIENCE

Full Stack Developer — MDARJ

Feb 2025 – Present

Full-time · Alexandria, Egypt (began during final year of degree)

- Contributed to **8 production projects** — SaaS platforms, an ERP system, B2B tools, and government platforms — owning end-to-end full-stack delivery on 4, using MongoDB, Express.js, React.js, Node.js, and TypeScript in an Agile team.
- Optimized RESTful API performance through Mongoose query tuning, pagination, and lean queries, measurably reducing response times on the platform's highest-traffic endpoints.
- Built JWT-based authentication and role-based access control reused across multiple platforms; integrated Socket.io for real-time features and AWS S3 / Cloudinary for file storage.
- Set up GitHub Actions CI/CD pipelines automating build, checks, and deployment to Vercel, removing manual release steps for the team.

Full Stack Developer — Priceless Health

May 2025 – Apr 2026

Part-time contract, remote · Dubai, UAE

- Developed features for a production medical SaaS platform serving patients and healthcare providers across the UAE, in a fully remote, cross-timezone Agile team on two-week sprints.
- Reduced API response times by **30%** on high-traffic medical-record endpoints through MongoDB compound indexing and schema optimization.
- Integrated the OpenAI API for AI-powered medical assistance and the WhatsApp Business API (Meta) for automated patient notifications.
- Built a geolocation service calculating real-time distance and travel time between patients and nearby clinics.

SELECTED PROJECTS

Mathil — Legal Compliance SaaS (Saudi Arabia)

React.js · MUI · Redux Toolkit · Node.js · Express.js · MongoDB · OpenAI API · WhatsApp Business API · Moyasar · Cloudinary

- Patent-pending platform enabling Saudi companies to answer government ministry questionnaires, detect regulatory violations, calculate fines, and generate corrective action plans — pay-as-you-go billing via Moyasar payment gateway.

Prosas — Facility Management ERP SaaS (Saudi Arabia) — Under Development

Next.js · Node.js · Express.js · MongoDB · Multi-tenant Architecture · staging.prosas-erp.com

- Multi-tenant SaaS platform for facility management and preventive & corrective maintenance, built Arabic-first with full RTL support for GCC field teams: equipment tracking via QR codes, work orders, preventive maintenance scheduling, spare parts and inventory, asset depreciation, procurement, billing, and SLA reporting & analytics.
- Each tenant gets an isolated environment on a dedicated subdomain with brand customization, role-based permissions, multi-currency support (9 currencies), and Hijri & Gregorian calendars.

Additional projects: Patria — full-stack ERP covering HR, inventory, and reporting (React.js, Node.js, MongoDB); Request — construction management SaaS for live UAE building-site operations (Next.js App Router, Server Components); Tansieq — Saudi Ministry of Hajj registration platform (React.js, high-concurrency); Dars — e-learning SaaS with 7 user roles (Next.js frontend on a .NET REST API).

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js (App Router, Server Components), Redux Toolkit, Zustand, Tailwind CSS, MUI, Shadcn/UI, HTML5, CSS3, Responsive Design, SEO

Forms & Validation: react-hook-form, Formik, Zod, Yup

Backend: Node.js, Nest.js, Express.js, RESTful API Design, WebSockets (Socket.io), JWT Authentication, Role-Based Access Control, Cron Jobs, SOLID Principles

Databases: MongoDB, Mongoose ODM, PostgreSQL, SQL, Indexing & Query Optimization, Schema Design

Integrations: OpenAI API, WhatsApp Business API (Meta), Google APIs, Moyasar Payment Gateway, AWS S3, Cloudinary, Geolocation APIs

Testing & DevOps: Jest, React Testing Library, Git, GitHub Actions (CI/CD), Vercel, Postman, Swagger / OpenAPI

Methodologies: Agile / Scrum, Code Review, Technical Mentoring, Cross-timezone Collaboration

EDUCATION & CERTIFICATIONS

B.Sc. in Computing and Data Science — Alexandria University, Faculty of Computing and Data Science

Sep 2021 – Jun 2025

Certification: Frontend Development Diploma — Route Academy, Cairo (2024) **Languages:** Arabic (Native) · English (B2, CEFR)
